“On 28th November, the Sri Lankan Railway participants currently undergoing their Fellowship Training Program on “Advanced Railway Operation Course for Sri Lanka” organized by Korean Railway (KORAIL) at the International Railway Training Centre for UIC Asia (iRaTCA). They visited and got the exposure on Korean experience at Electronics Engineering Monitoring Centre & their practices on the field visit and the group is shown in the above figure. During the training sessions both theory and practical covered with advocate amount of technology on Korean operations. Also in the picture is snowing in the winter at Korea.”
